**About US**

Mikisew Group has acquired minority ownership of JL Filtration, Alberta's leading provider of filtration equipment, field services, and rentals to North American industrial concerns since its original founding in 1986. JL Filtration offers a wealth of technical experience to complement its portfolio of carbon, sock, and coalescing elements as well as multi-bag and carbon filtration process modules, located in Nisku, Alberta.

The best, most comprehensive filtration solutions available

**Field Services**

We provide water quality management, pumping solutions, process chemical reclamation, pipeline services, mobile multi-stage filtration packages, and filtration equipment

**Filter Products**

Experts in supplying: Activated Carbon Elements, Activated Carbon, Coalescing Filters, Element Filters, Inlet/Fuel Gas Filter Elements, Instrumentation Filter Elements, Lube Oil Filter Elements and Sock Filters

**Bulk Activated Carbon**

We stock and supply multiple variations of Bulk Activated Carbon: Regular 8x30 Mesh Charcoal, Coconut Shell Acid Wash, pH Neutral. We supply in 1000lbs Super Sacks and 50lbs bags and more!

**Bag Filters**

Carbon Filled or Lined Bags, Dust Bags, Carbon Lined Bags, CNC Coolant Bags, Dust Bags Graduated Bags, High Efficiency Bags, Nominal Filter bags, Nylon Monofilament Bags & Oil Grabber Bags, Custom Manufactured Filters

**Vessels**

We routinely supply all types of vessels including:

Single Bag Filter Housings, Multi Bag Filter Housings, Fuel Gas Filter Housings, Inlet Filter Housings, Sand Filters, Coalescing Filter Housings, Carbon Canister Housings, Carbon beds, Separators, Inline Strainers

**Rentals and Portable Systems**

Single bag filters to high-volume pumps and everything in-between.

Custom orders are available in Canada & the US! Inquire within.
